Comments: (If possible, please reference section and/or page number in document if applicable.)

As a grassroots peace and justice organization/coalition we have worked for many years to end the nuclear system. We know all too well the horrific & long term dangers of nuclear power, nuclear waste & threat or use of nuclear weapons. Because of Fermi 1 & numerous problems & dangers from other great lakes basin nuclear power plants & uranium mines & mill tailings waste as well as other production for various parts of the nuclear system, many environmental & health harms & dangers exist. We are phasing out nuclear power plants because of their extreme harm, danger & because we have better safer ways of boiling water to generate electricity. The nuclear waste problem that exists must be dealt with by a systematic & proper study that takes place by leaving existing waste on-site and by stopping/phasing out all production.

2. Dangerous transportation of high-level waste to Yucca Mountain is both foolish & cruel (unjust targeting of Nevada & Western States region). The problems can only be exacerbated by Yucca Mountain.
